General Information

Tohoku University

Tohoku University was established in Sendai in 1907 as Tohoku Imperial University by consolidating an agricultural college and a science college. It is the third oldest former Imperial University after Tokyo and Kyoto.

Tohoku University is well known for its open and progressive policies. It was the first Imperial University to admit women and foreign students, and also pioneered in opening a university by offering public lectures. Already in 1911, Tohoku University graduated its first foreign students, thus becoming the Japanese university with the longest history of foreign graduates. All of these were epoch-making events in the history of Japanese higher education. The “Spirit of Open Doors” remains alive within the tradition of Tohoku University. Along with this spirit, the University has placed a high value on the “Spirit of Search for Truth” and emphasized original and creative research. Thus Tohoku University is known for its strong orientation toward academic research.

In the years following its establishment, Tohoku University has grown into an institution that includes the fields of medicine, science, and engineering among others. Currently the University has ten undergraduate and sixteen graduate schools, and six research institutes. The current student body consists of over 17,800 students, including roughly 3,400 international students from 93 countries and areas. The university is staffed with about 6,500 employees, including about 900 full-time professors.

The School of Engineering

The School of Engineering in Tohoku Imperial University was founded in 1919, and The School of Engineering has been developed in the spirit of “Research First”. Currently the School of Engineering has five undergraduate and six graduate departments, and 13 related institutes. The current student body consists of about 3500 undergraduate students and 1500 graduate students, including roughly 500 international students.
